Nathan Tabor

Will Fight For Taxpayers In Congress.

As part owner and Vice President of Revival Soy, Nathan understands the negative toll that high taxes take on our economy and families. Nathan is a committed conservative who will go to Congress and fight for lower taxes and tax reform. The Taxpayer's Bill of Rights or the TABOR Plan will provide taxpayers the type of tax relief and reform they deserve.

THE TABOR PLAN

The Taxpayer's Bill of Rights

Across the Board Tax Cuts – It's simple, Americans pay too much in taxes. Nathan believes that the best way to energize our economy is to let folks keep more of what they earn. In Congress, there will be no stronger advocate for lower taxes than Nathan. He will work tirelessly to lower the burden that taxes place upon all of us.

Repeal the Anti-Family Marriage Penalty – The idea that married folks should pay more in taxes than everyone else is foolhardy. Yet that is exactly what many married people do each year. Nathan will work in Congress to put an end to this injustice by fighting to eliminate the marriage penalty.

Permanent Elimination of the Estate Tax – People that work hard all of their lives should be able to pass the fruits of their labor onto their kin without the federal government taking a cut. That is why Nathan believes that Congress must eliminate the estate tax—permanently. Too many family owned small businesses and farms are being sold because hard-working families cannot afford pay this so-called "death tax" In Congress, Nathan will sponsor legislation to put an end to this horribly unfair tax.

2/3rds Majority to Raise Taxes in Congress – Nathan strongly believes that raising taxes should be made as difficult as possible. In Congress, Nathan will strongly support a constitutional amendment to require a 2/3rds supermajority to raise your taxes.

Comprehensive Tax Reform and Elimination of the IRS – For many of us, April 15th is a day that we all dread. Our tax system is simply too complicated and burdensome for most Americans. As our next Congressman, Nathan will be committed supporter of comprehensive tax reform that will eliminate the IRS and make the process of paying taxes simpler and fairer to all Americans.

Dear Friend,

I developed the TABOR Plan because I sincerely believe that you deserve to know where I stand on this important issue.

I believe that when it comes to taxes, too many politicians will say one thing to the voters and then do something entirely different in Washington.

In Congress, you have my word that I will work night and day to try and get as much of this plan passed into law. President Bush's tax plan was a good start. But I believe that we can do even better for American taxpayers by continuing to reduce taxes and passing comprehensive tax reform.
